

Keathley Landscaping Expands Rapid Sod Grass Installation Services Across North Texas

August 20, 2026

GARLAND, TX - August 20, 2026 -

Keathley Landscaping, a full-service landscaping company operating since 2002, is expanding its rapid sod installation services to help North Texas homeowners replace worn or damaged lawns in as little as one to three days. The company, which serves Dallas, Plano, Allen, and surrounding communities, reports growing demand for quick lawn transformations as property owners look to improve curb appeal and property value.

Keathley Landscaping specializes in converting bare or patchy yards into established green lawns using a range of grass varieties suited to the Texas climate. The company works with St. Augustine grass, Zoysia grass, Bermuda grass, and Tall Fescue, matching each variety to a property's sunlight, drainage, and usage conditions. In most residential cases, the installation of new sod is completed in a single day, while larger properties may require up to three days.

As a sod grass company with more than two decades of regional experience, Keathley Landscaping follows a structured process for each project. The work begins with clearing existing vegetation and preparing the

underlying soil. The team then addresses conditions that can undermine long-term lawn health, including pests, poor drainage, and weeds, before laying fresh sod delivered directly to the project site.

The expanded focus on sod installation plano and neighboring markets reflects broader interest among homeowners in fast, established results rather than the slower process of seeding. A finished lawn provides immediate ground cover, reduces erosion, and contributes to the overall value of a property.

"A healthy lawn changes the entire appearance of a home, and homeowners increasingly want results they can see right away rather than waiting through a full growing season," said Logan Keathley, owner of Keathley Landscaping. "The goal with every sod grass installation is to prepare the ground correctly so the new lawn takes root and thrives for years, not just for the first few weeks."

Keathley Landscaping notes that soil preparation is often the difference between sod that establishes successfully and sod that struggles. By resolving drainage issues and correcting grading before installation, the company works to create a stable foundation for root development.

"Every yard presents different challenges, from shade patterns to soil quality," Keathley added. "Matching the right grass variety to each property and correcting problems beneath the surface is what allows a new lawn to hold up through Texas summers."

Beyond sod, Keathley Landscaping offers a wide range of outdoor services, including landscape lighting, yard drainage and grading, stonework and retaining walls, French drain installation, flowerbeds and hardscapes, landscape design and installation, fence repair and installation, patio covers, outdoor kitchens, firepits, and tree trimming and large tree removal.

Keathley Landscaping is a full-service landscaping company based in Dallas, Texas, in operation since 2002. The company provides landscape design and construction, hardscape installation, lawn care, and maintenance services to residential clients throughout Dallas, Garland, Wylie, Plano, Allen, and the surrounding areas. Keathley Landscaping focuses on customer-driven projects that improve the function and appearance of outdoor spaces.
